

Lista Workspace Solutions

Educational institutions across the country are graduating to a higher level of organization and space efficiency with the aide of storage and workspace solutions from Lista. Utilizing a modular, building block approach, schools are custom outfitting classrooms, research labs, support services, facility maintenance and office areas with durable, versatile storage cabinets, the Storage Wall® system, workbenches and workstations that make smart use of every inch of available space.

Lista: Helping Schools Make Smart Use of Space.

At the core of each Lista storage solution is the unique Lista drawer, which can be subdivided into custom compartments to store a wide array of supplies, tools, instruments and sundry items of varying shape and size.

Lista storage and workspace solutions are ideally suited to the needs of schools. To help you accomplish your goals, Lista solutions:

- ▶ ***maximize available space***
- ▶ ***provide more clean, organized and secure storage***
- ▶ ***are rugged and durable for decades of use***
- ▶ ***are modular, versatile furnishings for classroom settings***
- ▶ ***are ergonomically designed to reduce stress and strain***
- ▶ ***can complement the unique aesthetic characteristics of your facility***
- ▶ ***can be custom-configured to meet your specific needs***
- ▶ ***protect expensive instruments, supplies and valuables***

Classrooms are a place for transformation, and classroom furniture should be as flexible and configurable as the learning environment itself. Lista's easily reconfigurable, highly ergonomic Arlink® 8000 workstation systems are the perfect solution for a variety of instructional settings. Arlink 8000 workstations can be configured for electrical and data uses, have shelves and accessories that are a cinch to reposition, can be configured in space-saving clusters ideal for classroom settings and are easily changed as needs evolve.

Arlink® 8000 Workstations Make Computer Labs Work at Illinois Institute of Technology.

Planning. Carefully designed architecture. Meticulous execution. These steps in designing a computer are equally important when designing and installing classroom furniture. At the Illinois Institute of Technology's (IIT) Electrical and Computer Engineering Department, the process of selecting and mapping out new furnishings for the department's numerous teaching and research labs started by partnering with Lista and choosing our Arlink 8000 workstation system. The department's criteria were many, beginning with contemporary, good-looking, space-saving and ergonomically sound furniture. IIT needed a solution that would enable students to have plenty of room for their myriad test and measuring equipment, where they could work for many hours in ergonomic comfort. Further, the workstations had

to be customizable to meet the different needs of the department's many labs. The result: a uniform, handsome suite of labs furnished with custom-designed Arlink 8000 workstations that works perfectly.

“It was very important that we get a custom solution for our labs, and Lista worked closely with us to achieve a custom-tailored plan. The Arlink 8000 workstations are really fantastic.”

Dr. Erdal Oruklu
Assistant Professor,
Electrical &
Computer
Engineering Dept.
Illinois Institute of
Technology

Students can be tough on equipment. So whether they're in a hands-on shop or the classroom, vocational technology students benefit from the durability of Lista's storage solutions. The heavy-duty Storage Wall® system can store a wide range of tools, parts, instruments and supplies no matter their shape or size. Our drawer cabinets are perfect for the organized, high-density storage of tools and parts, and cabinets with shelves and roll-out trays hold a variety of heavy, bulky items. Whatever your storage needs, Lista has what you're looking for.

Four Rivers Career Center Stores the Tools of All Trades with Lista.

When the Four Rivers Career Center moved into their new state-of-the-art building, they had to equip a number of educational shops, including areas where welding technology, auto technology, machine tool technology and collision repair technology are taught in a hands-on setting. The school needed durable products that could stand up to the students' hard use, that would provide much-needed organization, and that provided good looks that would reflect on the Center's high standards. Four Rivers invested in a variety of Lista products, including heavy-duty Storage Wall® systems, drawer storage cabinets, shelf cabinets and workbenches.

“ We needed durable products that will still be around in 20 to 30 years. We've been thoroughly satisfied with our Lista solution. We've got a first-class looking environment now, and when we need more furnishings, we'll buy more Lista. ”

Steve Matyas
Director
Four Rivers Career
Center

The products' quality and durability has more than met their expectations, and instructors particularly appreciate the organization that the products' modular storage has afforded them.

In schools, looks matter. Aesthetically pleasing surroundings can play a vital role in encouraging students, faculty and staff throughout the learning process. Handsome, attractive Lista products stand up to daily wear and tear while retaining their functionality and good looks. From classroom tables to student lockers, from heavy-use student workshops to public areas, Lista's products are built to withstand decades of use without looking abused.

Lista Workstations Make an Art of Workspace at the School of the Art Institute of Chicago.

The School of the Art Institute of Chicago, a leader in art education for over 140 years, is constantly changing and growing to meet the needs of its diverse educational goals. As part of its commitment to world-class resources, SAIC has partnered with Lista for a number of years to equip its classrooms and studios with handsome, functional, durable workbenches, tables, storage and workspace furniture. In such different disciplines as silkscreening, etching, ceramics, printmaking and architecture, Lista-equipped work areas continue to meet student and faculty needs.

From planning and design to execution, the Lista team partners with SAIC staff to provide CAD drawings, room layouts and unique solutions. Lista's ability to customize its products to meet specific needs has made its products the solution of choice.

“Lista's products are bullet-proof. Working with the company has been a great experience. Lista never says 'no, you can't do that.' We collaborate to make design decisions, the way you would with a high-end office furniture company. Yet their pricing is still competitive.”

Tom Buechele
Executive Director
for Facilities,
Operations and
Capital Planning
SAIC

A school is only as good as its support system, and science support departments deserve the same high-quality products that students use. Lista storage and workspace products provide durable, high-density, versatile solutions that enable support groups to maintain an institution's high standards. From workbenches for a wide range of fabrication, assembly and repair tasks to mobile cabinets and workbenches that bring organized storage and workspaces right where they're needed, Lista helps support departments make the grade.

Lista Helps Simon Fraser University Get Storage Down to a Science.

“The Lista stuff is rugged – it won't fall apart like other products I've seen. I'm amazed at how compactly things like semi-conductors fit into drawers. Lista storage products and workbenches are the best product on the market.”

Ray Holland
Supervisor,
Electronics Shop
Simon Fraser
University

Simon Fraser University, one of Canada's leading research universities, supports its extensive research programs with the Science Technical Centre's machine, glass and electronics shops. The shops' high standards inevitably led them to invest in Lista storage and workbench products. In the machine shop, Lista products include cabinets and mobile cabinets to store a variety of CNC tools, workbenches with the Nexus accessory system, mobile workcenters and Control Stations. The glass shop features a cluster of workbenches with phenolic resin worksurfaces and large drawer pedestals to store delicate glassware. In the electronics shop, tiny semi-conductors are stored in organized, high-density storage cabinets, while larger, heavier instruments are housed in a Storage Wall® system with roll-out trays. Adjacent workbenches take advantage of the Nexus system to hold heavy instruments on above-worksurface shelves.

For the ultimate in versatility and mobility, schools turn to Lista's mobile cabinets and workbenches. They feature all the flexible, highly organized storage of our modular drawer cabinets with casters added for storage on the go. With Lista's mobile systems, large volumes of instruments and parts can be moved directly to the work area where they can be readily accessible to students and trainees, a convenience that increases classroom productivity.

Lista's Mobile Workstations Keep Industrial Education Rolling Along at Con Edison.

At Con Edison's 90 room Corporate Learning Center, adult learners from inside and outside the company take advantage of a wide range of skills training classes. Custom configured Lista cabinets and mobile and stationary workbenches provide Con Edison with rugged, extremely flexible workstations. Specialized testing equipment and heavy-duty components are mounted to butcher block cabinet tops to create durable, ergonomic workspaces. Lista's modular drawers provide secure, organized, space-efficient storage for a huge range of technical and electrical equipment that includes meters, calipers, machine shop tools, gas gauges and technical manuals.

“ Each classroom in our facility has multiple users, so the flexibility of the Lista workstations is extremely important. We can easily change the classroom environment by rolling benches in and out. We can also reconfigure drawer interiors to accommodate different items. ”

Steve Dinardo
Facility Manager
Corporate Learning
Center
Con Edison

Lista lifetime warranty. *Lista's confidence in the quality and durability of our materials and workmanship allows us to offer a lifetime warranty on materials and workmanship. Please ask your Lista representative for a full warranty statement and details.*

Solutions Designed To Meet Your Needs.

Free design services. *Lista's engineering and design team is ready to provide you with a detailed plan for your individual workspace and storage needs, free of charge. We offer solutions that are designed for maximum efficiency and future flexibility, optimizing space and functionality.*

- **Floorspace utilization analysis.** *We can prepare plan and elevation CAD drawings for a grouping of products, or entire room-sized solutions.*
- **Customized surveys and layouts.** *Lista experts will survey your current and future storage and workspace needs, and propose solutions that provide the highest density and greatest productivity.*
- **Integration with architectural and construction planning.** *Rely on our experience with coordinating with architectural and construction professionals at any stage of a project's development.*
- **Price quotes.** *We are happy to provide free estimates and price quotes for any project, regardless of size.*
